6 November 1969

MEMORANDUM FOR: Deputy for Operations, OSA

SUBJECT : Station Activity Report
September 1969

1. Reference PART I A. (5) and D.1. (a) on the LOX low-pressure lights has been reviewed.

2. Life Support agrees that most likely there was insufficient buildup time in this particular instance. However, historically, the 1-to-24 hours filling period prior to a given flight has been successful in both Air Force LOX Systems as well as with the experience over the past year

3. In the absence of any additional episodes of this dyscrasia, it is felt that the existing policy should remain as the SOP.
